Compliance		12%	88%

Erasmus + “Open your minds through games”

with lotto rules			
Total utility for you		15%	85%
Total utility from contact with partners		32%	68%

Have you encountered any difficulties playing games with children?

For the game all was OK,

What do you think should be changed to improve work on the activities / games in the project?

Maybe we had to have more time to play with them, in order to be able to exploit all the different pictures.

In our group, the age of children is small, not everything was clear, children forget the names.

There were no difficulties, but preliminary work was required to explain to the children the meaning of the pictures on the lotto.

No, there were no difficulties, the children immediately understood the rules of the game and observed them. Children observed the rules, participated in the games. It took a preliminary preparation for the game, it took more time.

It is difficult for young children to remember artists, paintings, dishes.

No difficulties arose. The game is accessible, useful, interesting.

What do you think should be changed to improve work on the activities / games in the project?

Developed clear recommendations in the compilation of games.

As many games as possible, with the help of which children get acquainted with different countries.

Erasmus + “Open your minds through games”

In my opinion, nothing needs to be changed, everything is already excellent. The game is good at work. It is desirable to increase the size of the lotto, it is more convenient to watch and play. Diversify game methods, add to the game video acquaintances with countries.

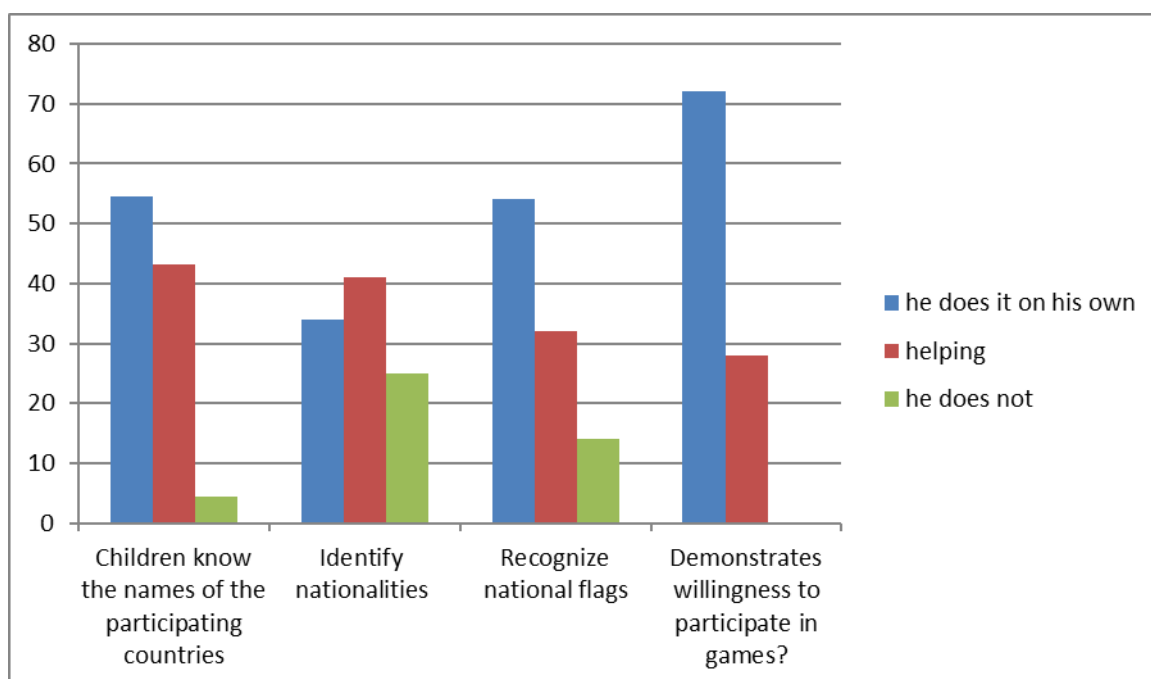

Increase the number of games for the project.

I propose to increase the quality and quantity of illustrations - pictures for lotto.

The game is interesting. Thank you for the opportunity to play.

Large and bright illustrations are needed for children.

4.Level of competencies in the children participating in the project / assessment by the teachers in the groups /
